## The American Psychiatric Association Publishing Textbook of Substance Use Disorder Treatment, Sixth Edition

*Edited by Kathleen T. Brady, M.D., Ph.D., Frances R. Levin, M.D., Marc Galanter, M.D., and Herbert D. Kleber, M.D.*

The Sixth Edition has been completely revised and restructured and represents the cutting edge of research, practice, and policy in substance use disorder treatment. A one-stop reference for evidence-based information on neurobiology, assessment, treatment, and research trends in SUDs, the book is an indispensable resource for trainees and veteran clinicians alike. Noteworthy additions are the new and substantive sections on public health issues and comorbidities, the expanded coverage of cannabis and the new chapters on digitally delivered therapies and behavioral addictive disorders. This volume is dynamic and comprehensive.

## Prenatal Alcohol Exposure A Clinician's Guide

*Mansfield Mela, M.B. B.S., M.Sc.*

This much-needed book provides content useful for professional training across mental health disciplines and addresses topics missing from medical curricula, including the long-term effects of prenatal alcohol exposure (PAE), in-depth discussion of fetal alcohol spectrum disorder (FASD), and clinical information on the mental disorders relevant to FASD. Epidemiology, etiology, presentation, assessment and diagnosis, and treatment are all addressed in depth, as are special populations, including children and adolescents, seniors, and people incarcerated or otherwise involved in the criminal justice system.

## Motivational Interviewing for Clinical Practice

*Edited by Petros Levounis, M.D., M.A., Bachaar Arnaout, M.D., and Carla Marienfeld, M.D.*

The book provides busy clinicians with expert guidance for integrating motivational interviewing into their practice. Health professionals typically are trained in patient-centered interviewing, but motivational interviewing, which helps patients change their health behaviors, requires practice and focused attention on skill development. The study questions at the end of most chapters, accompanied by an answer guide, will help reinforce basic concepts and can be used for self-study and board or general review.

## The Addiction Casebook

*Edited by Petros Levounis, M.D., M.A., and Abigail J. Herron, D.O.*

This book consists of 13 clinical cases that exemplify DSM-5 addiction diagnoses commonly encountered in clinical practice. The *Casebook* lays out realistic and effective strategies to diagnose and treat patients with addictions ranging from alcohol and caffeine to gambling and problematic Internet use and includes multiple-answer questions at the end of each chapter designed to strengthen readers' knowledge. The volume also elucidates the intersection of addiction and other psychiatric diagnoses.

## The Behavioral Addictions *Video Illustrated!*

*Edited by Michael S. Ascher, M.D., and Petros Levounis, M.D., M.A.*

The book provides a pragmatic and engaging guide to help clinicians understand and contextualize conditions that may not be clearly delineated in the DSM-5 diagnostic system. Although not accorded a specific classification, the behaviors addressed in this book share the accepted hallmarks of addiction—continued engagement in an action despite negative consequences and loss of control over one's own life. The editors begin with an overview of the behavioral addictions from neurobiological, theoretical, clinical, and forensic perspectives and then present 12 case studies focused on a variety of behaviors, from exercising to Internet gaming and from kleptomania to tanning.

## Pocket Guide to Addiction Assessment and Treatment

*Edited by Petros Levounis, M.D., M.A., Erin Zerbo, M.D., and Rashi Aggarwal, M.D.*

Substance use disorders can be among the most difficult and vexing to treat. What is a clinician to do? This guide is designed to help a wide range of clinicians more confidently face this challenge, regardless of their experience with substance addiction. Twenty concise chapters accessibly address a broad spectrum of topics, including the fundamentals of addiction; specific substances and addictive behaviors, including gambling disorder; and treatment approaches, including special issues with psychiatric and medical comorbidities.

## Clinical Manual of Youth Addictive Disorders

*Edited by Yifrah Kaminer, M.D., M.B.A., and Ken C. Winters, Ph.D.*

The book focuses on the clinical implications of beginning substance use and the pathways to substance use disorders (SUDs) and coexisting disorders among adolescents and college-age emerging adults. This new manual not only captures the advances made in the youth substance use and SUD domains but also includes new and critically important topics that have emerged in the interim, such as pediatric assessment and intervention, electronic tools for assessment and treatment, maternal fetal addiction, cannabis and e-cigarette use harmfulness, and the new products/delivery systems and innovative patterns of use that have surfaced.

## Youth Substance Abuse and Co-occurring Disorders

*Edited by Yifrah Kaminer, M.D., M.B.A.*

This book provides a state-of-the-art, evidence-based review of substance abuse, the prevalence of psychiatric comorbidities, and other high-risk behaviors in youth. It examines the theory and practice with which clinicians must be conversant to assess, treat, and develop services for adolescents with SUDs. Common comorbid conditions include depression and schizophrenia, self-harm behaviors, and bipolar, anxiety, posttraumatic stress, attention-deficit/hyperactivity, conduct, and oppositional disorders.

## Clinical Manual of Addiction Psychopharmacology, Second Edition

*Edited by Henry R. Kranzler, M.D., Domenic A. Ciraulo, M.D., and Leah R. Zindel, R.Ph., M.A.L.S.*

This edition offers current information on the pharmacology of the major classes of drugs related to addiction, as well as the latest pharmacological treatment of dependence on these drugs. In addition, the manual reflects recent research findings and evidence-based perspectives on the pharmacological actions of other drugs of abuse.

## Co-occurring Mental Illness and Substance Use Disorders

**A Guide to Diagnosis and Treatment**

*Edited by Jonathan D. Avery, M.D., and John W. Barnhill, M.D.*

The book presents an evidence-based approach to patients with at least two psychiatric disorders, one of which relates to substance use. Because co-occurring disorders are more the rule than the exception in psychiatry, the editors emphasize that patients should be carefully evaluated for a broad range of disorders, which should then be addressed clinically. The book provides straightforward strategies for diagnosing and treating people with complicated presentations.

## Marijuana and Mental Health

*Edited by Michael T. Compton, M.D., M.P.H.*

With relatable clinical vignettes that illustrate the applicability of each chapter's content, as well as key chapter points that summarize major themes, this is the definitive, single source of comprehensive information on marijuana and mental health in modern American society. Balanced, focused, and highly readable, chapters address topics such as the effects of marijuana on the brain and mind, marijuana-related policy and legislation, the complex link between marijuana use and psychotic disorders, synthetic cannabinoids, and the treatment and prevention of marijuana misuse.
